

LT6

LR6 Trim Accessory

Product Description

The LT6 trim accessories are designed to snap onto LR6 downlight modules and to provide a clean aperture appearance. They are available in a number of color options to complement the interior design. They decrease high angle brightness with minimal effect on the fixture output.

Specifications and Features

- Spun aluminum trim with diffuse anodized finish
- Room-facing flange is painted white
- Injection molded retaining ring allows for positive attachment to the LR6 family of modules
